## NOTE TECNICHE - TECHNICAL NOTES

- Realizzazione di controtelai con intervalli in altezza e larghezza ogni 50 mm. • La luce nominale (L) è ridotta di 10 mm.
- È consigliabile pannello porta con SP max 40 mm, comprese eventuali cornici fermavetro.
- Per il fissaggio delle lastre in cartongesso utilizzare viti L max 19 mm in corrispondenza delle doghe di rinforzo della lamiera.
- Per l'uso di pannelli in vetro è necessario il Kit monopinza vetro Linear® (vedi pag.267).
- Per misure speciali verificare fattibilità in azienda.
- It is advisable to install a door panel with a max. thickness of 40 mm, including any frames for glass.
- To fasten the plasterboard sheets, use screws of max. 19 mm in correspondence with the reinforcement slats of the sheet.
- Standard equipment includes white weatherstrips and white brushes.
- The settings for the plumbing system are on both sides of one pocket frame for the Type A version, and on both pocket frames for the Type B version (to be specified when ordering).
- The use of 12.5 mm thick plasterboard sheets is recommended.
- Creation of pocket frames with height and width intervals every 50 mm. • The doorway (L) is reduced by 10 mm.
- Dimensions available on request: L=500+500 ÷ 1300+1300 mm e H=500 ÷ 2700 mm.
- Standard equipment includes white weatherstrips and white brushes.
- The pocket frames have the predisposition for the installation of the CoverColor kit (see page 125).
- It is possible to host on each side of the frame up to nr.3 plumbings with Ø max of 25 mm insulation included.
- Standard payload of the supplied hanging kit: 150 Kg.
